

# **CURL**LOK™

*Available in every DBCI door series and color*

## Change is easy.

---

With new **Curl-Lok™** technology, every DBCI door series becomes a more cost-effective solution. **Curl-Lok** panels are easily replaced one at a time, so you no longer have to replace the entire door. Enjoy the same quality you have come to expect from DBCI with less down time and lower repair costs.

Experience DBCI's latest innovation at [curl-lok.com](http://curl-lok.com).

Integrity. Partnership. Quality.

# **CURL**LOK™

*change is easy*

## **Don't replace. Repair.**

In the past, a damaged door had to be completely replaced. Now you can easily repair only the damaged section.

## **Less down time.**

Extra panels can be kept on site and repair work can be accomplished in a matter of minutes.

## **A better bottom line.**

Individual panels cost a fraction of the cost of an entire door for immediate cost-savings.

## **Uncompromising quality.**

Thanks to years of testing and development, Curl-Lok doors maintain the same structural integrity standards as all DBCI doors.

## **Wind-rated.**

Curl-Lok doors meet or exceed the requirements for most building codes, including U.S. coastal regions.

Integrity. Partnership. Quality.
